NSF Protocol P151 Health Effects from Rainwater Catchment System Components

Protects against water and reflects UV rays

Henry® 487 100% Silicone White Roof Coating is a premium, 100% silicone, moisture-cure coating that seals and waterproofs a range of roofing surfaces and types even as it reflects the sun's heat and UV rays. While suitable for use in all climates, **Henry® 487 100% Silicone White Roof Coating** is well suited for extreme environments and is designed to maintain maximum weatherproofing and UV reflectivity as it ages.

Thanks to its 100% silicone technology, **Henry® 487 100% Silicone White Roof Coating** chemically bonds with the roof as it cures, enabling permanent resistance to ponding water, and superior capabilities of sealing and protection. It is easy to apply in as little as one coat by spray, roller or brush, and it features low VOC with excellent adhesion and flexibility.

Features and benefits

100% silicone chemistry means a 100% waterproof seal

Rain-Safe in 15 minutes and resists ponding water permanently

Stands up to sun, rain, wind, ice and snow

Lifetime limited warranty
