### COMFORT FIRST!

Furniture should take up residence in the backyard, where the pieces create a cozy nest ideal for gatherings and solo relaxation. This trend ties in perfectly with the idea of slow living, which encourages taking life at a more leisurely pace. Simple, minimalist pieces are hot right now—think aluminum sets and poufs—along with furniture that sets you adrift to faraway places, like ottomans, egg chairs and hammocks. A dash of the exotic will never go unnoticed!
